

Golaghat

Bipul Duwara of village Hensuwa Gharpolia, Golaghat, Assam irrigates 30 bighas of his land. He cultivates rice and vegetables such as pumpkin, cabbage, potato etc. Before the implementation of PMKSY scheme in his village Bipul's income from cultivation was meagre since production was low. He had to wait for rain water to cultivate his land which hampered his farming.

After installing electrical tubewell received under PMKSY scheme, Bipul's production has increased due to timely farming and so is his income. He no longer depends on rainfed water for irrigation. He has been prospering in his agri business since then. Bipul Duwara expresses happiness over the implementation of PMKSY scheme meant for the welfare of farmers.

Majuli

"Fortune favours the brave," this famous proverb proved to be true for Mr. Bimal Narah of Thakur Suti Village in Majuli district. Water scarcity, droughts, low yields, low income, Mr Narah has seen it all. But, come what may, he did not compromise on his passion to pursue farming and kept his efforts on. Mr Narah got an electrical tubewell installed in his field under the PMKSY scheme and never looked backward from then on. The pump not only resolved his water scarcity and irrigation issues but also increased his production to a great extent. "My farmland now produces about 400 kg of both Ahu and Bodo rice which was a meagre 160 kgs earlier," a happy and content Bimal Narah shares.
